

Bigpipe and Lightbox, a match made in cyber heaven.

This is a sponsored post written by Alex Casey from [The Spinoff](#)

Lightbox have rolled out their platform to a plethora of new compatible devices. Alex Casey from the Spinoff takes us through the latest device additions for Lightbox.

Like Johnny Depp in *Transcendence*, video-on-demand service Lightbox has escaped the boundaries of traditional technology to bring television almost anywhere. Here are a few of the places you can watch TV anywhere, anytime.

iPads

Just download the free app [from the Apple store](#) and you're away laughing. Or crying. Depends what you're watching really.

iPhones (4S and above)

As long as you have an iPhone 4S or above, you can take TV in your pocket wherever you go. [Click here to get amongst it.](#)

Android tablets and Phones (v. 4.2 and above)

Android fans rejoice, if you have a phone or tablet operating on version 4.2 or higher, you can download the Lightbox app [here from the Google Play store](#) and get watching today.

Samsung Smart TVs

It's the new kind of TV...on the old kind of TV. Get started [here](#).

PlayStation 3 & 4

Playstation have started making their own TV shows ([Powers](#),

anyone?), so it's only fair that you can enjoy Lightbox on your Playstation 3 or 4 as you wish.

PCs

That's right, Lightbox remains available on all PCs as well on Safari, Internet Explorer and Firefox only.

Macs

It never really left, Lightbox can still be enjoyed online from a Macintosh computer at your leisure. How do you like those entertainment apples!

[Click here to sign up to Bigpipe and receive 6 months Lightbox on us.](#)
